Pogoria III Lake

Lake Pogoria III - one of the IV generated as a result of flooding of former opencast sand mine lakes in Dąbrowa. Currently, the path is poured around the asphalt, which makes it just as maximal Pogoria IV, also this is a great place not only for beach goers, but also people interested in outdoor activities - for example, practicing Nordic walking, cycling, road or roller-skating.

In addition, there are two water equipment rentals - kayaks, sailboats and windsurfing boards. Place one of a kind, combining the Silesian industrial character with the beauty of nature. View of the setting for the Power Plant chimneys sunset on the lake is beautiful.
